WHAT IS CRYPTO TRADING?

Bitcoin is a global digital currency that is decentralized and not controlled by any government or institution. It offers a fast, secure, and anonymous way to send and receive money.

Bitcoin and Cryptocurrency Trading Bitcoin, along with other cryptocurrencies (such as Ethereum, Ripple, Dash, etc.), can be traded by speculating on cryptocurrency price movements. This involves predicting price changes to make a profit, such as buying at a low price and selling at a higher price. Trading is conducted through exchanges, enabling users to capitalize on these price fluctuations for profit.
